Abstract

Hepatic cirrhosis is one of the leading causes of death worldwide, especially if complicated by Ascites. This chronic condition can be related to the classical disease entity Jalodara in Traditional Indian Medicine (Ayurveda). Ascites is the accumulation of fluid in the peritoneal cavity. It is the most common manifestation of liver dysfunction. In modern science still there is no sure treatment which cure the patient of Ascites totally. It gives only symptomatic relief with time dependent recurrence. In such type of cases Ayurvedic treatment therapy gives result without any side effects. In Ayurveda there are 8 types of Udarroga are mentioned, and this case will be correlated with Jalodara.

A 45 yrs. male patient came to OPD with abdominal distension, bipedal edema, anorexia, icterus, general weakness etc.since 1 month. He was given Nitya Virechana with Trivrutta Avaleha and Ayurvedic Shamana Chikitsha as well as restricted diet plan for 3 months with cow milk. After two months of treatment marked improvement was noted in all symptoms of the patient. Hence it was concluded that ayurvedic management are useful in Jalodara.

Keywords: Jalodara (Ascites); Ayurveda; Nitya Virechana; Godugdha; Dietrestriction

1. Introduction

Jalodara (Ascites) is one of the critical disease among the eight types of Udarroga1. According to ayurveda, Jalodara is accumulation of fluid in abdominal cavity. It is of two types i.e., Svatantra2 (independent or primary) and Paratantra (secondary) that is due to other diseases. Acharya charaka says Jalodara is an incurable disease and Susruta called all Udra Roga as a Mahagada i.e., grave aliment and difficult to treat. Among Tridosha, Prakupita Vata gets accumulated in Udra between Twaka (skin) and Mansa (muscle). Because of Mandagni, there is Mala Sanchya and Doshya Sanchaya occurs and which causes Strotorodha of Udakvaha & Rasavaha Strotasa3. Then it disturbs Prana (heart) Apana (renal), Agni (liver) and ultimately causes accumulation of Udaka (fluid) in body mainly in Udra, which is cardinal feature of Jalodara. Jalodara (Ascites) as a disease has been described extensively in ayurveda along with medical treatment & surgical procedures.

Along with the aggravated Vata, Agni (digestive fire) which is Manda (low) also causes Udararoga. Hence, there are multiple factors involved in the causation of Udararoga4.

In other terms, Udra is manifested because of vitiated Rasa Dhauti portion which gets extravagated from Koshtha and Grahani gets collected in Udra5. Ayurvedic management with drugs such as provocation of digestion, daily therapeutic purgation, stimulant for hepatic function and only milk diet that acts on root of pathology of Ascites and by breaking down of pathogenesis gives good result in Ascites.

Diet and water restriction is an important thing in the management of Ascites. Ayurvedic management with drugs such as provocation of digestion, daily purgation, hepatic stimulation and only milk as a diet, that acts on root of pathology of Ascites and breaking down pathogenesis gives good results in Jalodara (Ascites). Hepatic cirrhosis incidence in India could be high due to high prevalence of Hepatitis B & C fatty liver disease and even increasing trends of alcohol intake. Cost of hepatic cirrhosis on quality of life, loss of productivity, medical expenses are high. Treatments to stop progression from compensated to decompensated stage are being tried. Liver transplantation is the only treatment in the end stage liver disease.

2. Case report

A 45 yrs. male patient with chief complaints of Anorexia, Abdominal distension, Bipedal edema, Mild icterus, General weakness: 1 months.

2.1. Present illness

The patient was alright before 1 months, after that the patient has develops Anorexia, abdominal distension, bidental edema, mild icterus and general weakness. Hence, he came to Kayachikitsa Department of Sane Guruji Arogya Kendra, Malwadi, Hadapsar, Pune. Patient was admitted in indoor patient department for Ayurvedic treatment & daily observation.

- Past history: HTN, DM, etc.
- Surgical history: No major surgical illness.
- H/O- Addiction: Chronic Alcoholic since 20 yrs.

2.2. Physical examination

- Systemic examination (per abdomen).
- Inspection - Distended abdomen.
- Palpation- Tenderness in the right hypochondriac region. Hepatomegaly - 3cm below Rt costal margin.
- Percussion Fluid thrill - present Shifting dullness.

2.3. Pathya-Apathya

Diet was restricted to the patient and she was kept on only cow milk (Shunthi Siddha Godugdha). All type of food items and water were restricted for 3 months. When the patient was hungry or thirsty, she was given lukewarm Shunthi Siddha Godugdha only. Medicines were also given with cow milk as an adjuvant.

3. Results

Significant results were found in all the symptoms, abdominal girth and bipedal edema.

4. Discussion

4.1. Discussion on cause of Ascites

In Charaka Samhita, Acharya Charaka has mentioned many causes of Udararoga. In the present case patient was alcohol addict and he consume alcohol since 6yrs continuously and he has habit of eating spicy, salty and over eating in the presence of low digestive fire (Mandagni).

4.2. Discussion on treatment of Ascites

4.2.1. Nidan Parivarjana

This disease can occur due to multiple causative factors. It includes Ushna, Lavana, Vidahi, Amla and Virudha Ahar Sevana, and poor lifestyle such as Vegdhara (suppression of natural urges). So avoid all these factors and it will help to break down of Pathogenesis of Ascites. Along with diet and water intake was restricted and the patient was kept only on milk diet. Agnidipana (provocation of digestion), Mandagni is the main cause of all types of Udarroga. For Agnidipana, Hingvasthaka Churna and Kumari Asava were given. It enhances Agni (digestive power) and helps to Samprapti Vighatana. Strotoshodhana and Apya Dosha Harana. Mainly Strotosangha occurs in Udarroga, it is necessary to go for Strotoshodhana in order to remove the obstruction by using Tikshna, Ushna, Khara Yukta medicine, such as Arogavardhini Vati, Phaltriakadi Kwatha. It removes Strotosanga (obstruction) of channels and helps in Samprapti Vighatana. Simultaneously, there was removal of Apya Dosha (water retention) also. Nitya Virechana (daily therapeutic purgation) Restoring the Agni by expelling Bahudoshatva by means of Stoka Stoka Nirharana and preventing further accumulation. This can be done by administering `Nitya Virechana'.

- Indication of Nitya Virechana Durbalapi Mahadosha

Patient who are weak and in whom there is excessive accumulation of Dosha. Dosha Atimatra Upachayath: If Dosha are in morbid state.

- Margavarodhath

When morbid doshas causes the obstruction to the channels. Chikitsa Sutra is Nitya Virechana to break up the Sanga of all Doshas and retained fluid and separate them, Virechana is necessary. In the present case Trivrutta Avleha was given for Virechana purpose. Daily 6-8 Vega ware noted in patient after giving Trivrutta Avleha.

4.2.2. Nidana Parivarjana (Avoid Causative Factors)

For this diet and water, intake was restricted and the patient was kept only on milk diet.

4.2.3. Agnideepiti (Provocation of Digestion)

Mandagni is the chief factor in any type of Udararoga. For Agnideepiti, Trikatu Churna (for 6 days) and Shivakshar Pachana Churna (for 15 days) were given to the patient. It enhances Agni and helps in Samprapti Vighatana (breakdown of pathogenesis).

4.2.4. Nitya Virechana (Daily Therapeutic Purgation)

Chikitsa Sutra of Jalodara is “Nitya Virechana.”To break up the Sanga of all Dosha and retained fluid and separate them Virechana is necessary. Liver (Yakrita) is the Mula Sthana (main site) of Rakta. RaktaPitta has Ashraya and Ashrayi Sambandha (mutual interdependence), hence for elimination of vitiated Pitta Dosha, purgation is the best treatment. Virechana also decreases abdominal girth and edema by decreasing fluid in the abdominal cavity. Abhayadi Modaka was given in present case for Virechana purpose. Daily 5–8 Vega were noted in patient after giving Abhayadi Modaka. More results were achieved in all the symptoms after starting daily therapeutic purgation.
4.2.5. **Arogyavardhini Vati**

Its main content is **Kutki**, which acts as *Pitta Virechana* and acts on *Yakruta* (liver). *Arogyavardhini Vati* maintains the liver function and promote the balance as well as healthy digestive system. It also contains **Tamra, Loha and Abhraka Bhasma** (purified metals power). These *Bhasma* also having *Chedana, Bhedana* property and helps to open the obstructed channels. In the management of *Udarroga* and it also reduces the *Shotha* (swelling). In the present case, patient had all these symptoms with *Jalodara*.

*Arogyavardhini Vati* is known for its benefits especially to the liver. *Arogyavardhini Vati* maintains the liver function and promotes balance as well as a healthy digestive system.

Its main content is **Katuki** (*Picrorhiza kurroa* Royle ex Benth.) which acts as *Pitta Virechana* and acts on *Yakrita*. *Ascites* may be caused due to any pathology of liver, heart, kidney, etc., but *Ascites* from liver disease is difficult to be treated; hence, there comes the need to correct the pathology from its root cause. In the present case, the patient also has hepatomegaly hence these drugs were administered. *Sharapunkha* is the drug of choice in spleen and liver diseases. It corrects the working of digestive system. It improves the functioning of liver. The study shows that *Sharapunkha* has hepatoprotective activity.

4.2.6. **Phalatrikadi Kwath**

It can help support liver functions and loss of appetite. the ingredients may also help manage gas, stomach bloating, belching, indigestion, constipation and heartburn. *Amalaki* may aid in supporting the heart, and healthy blood sugar levels, protecting and strengthening the liver and digestive system. *Haritaki* can help ease constipation by cleansing the intestines and removing toxins from the body. It may also be effective in reducing stomach acidity.

- **Key Ingredients**
  - *Amalaki*
  - *Bibhitaki*
  - *Haritaki*
  - *Guduchi*
  - *Vasa*
  - *Kalmegha*
  - *Nimba*
  - *Kutaki*

- **Key Benefits**
  - It may help boost immunity
  - It can reduce indigestion and constipation
  - It may remove toxins from the body and regulate bowel movements
  - It may improve the digestion process

- **Directions for Use:** Take 3-6 teaspoonful (15-30ml) after meals with an equal quantity of water.

4.2.7. **TrivrittaLehyam**

*Trivritta Lehyam* is an effective Ayurvedic medicine for constipation. It is in herbal jam form. It is also known as *Trivritadi Lehyam* and *Trivrth Leham*. It is mainly used in Ayurvedic Panchakarma treatment called *Virechana*.

*Trivritta Lehyam* Benefits

- It helps to relieve constipation; this is a first-rate purgative with no bad taste.
- It is good for the heart.
- It is used in Ayurvedic Panchakarma treatment called *Virechana*.
- This medicine should be taken strictly under medical supervision only.

*Trivritta Lehyam* Dose

- 3 – 6 grams once or two times a day after food or before food.
- It is administered along with honey, milk, or warm water.
For purgation, it is taken between 4 to 6 a.m. to be followed up with frequent drafts of hot water. Keep in mind that Virechana is done after Snehana and Swedana. As a daily laxative, this is taken 5-10 grams after dinner.

4.2.8. Punarnava Asava

In Liver disorders, Punarnava is used to revitalize and clean the liver. According to Ayurveda, when the liver is unable to perform well it also leads to an imbalance of Vata–Pitta-Kapha Doshas. This might lead to liver diseases like jaundice. Taking Punanarva helps to correct the function of the liver by removing toxins from the liver cells. This is because of its Shodhan (purification) and Mutral (diuretic) properties. Punanarva also helps to improve digestive fire due to its Deepan (appetizer) property. It helps to digest the food easily and reduce the burden of liver. This useful in gastritis, oedema, liver diseases and widely used as herbal anti-inflammatory and anti-oedema medicine. It reduces swelling, useful in liver and spleen condition. It reduces excess water collection in the body.

- Tips
  - Take 1-2 teaspoon of Punarnava juice.
  - Add the same quantity of water to it.
  - Have it once or twice a day before taking meals to get rid of the symptoms of liver disorders.

Arkapatta Bandhana avoids Vata Prakop by mrudu swedana and is supportive to diuretic action. Cow milk gives strength to the patient without increasing body fluid level in the body. Udara is Asadhya vyadhi as per ayurveda but we could give symptomatic relief, reduction in fluid, improvement in quality of life of the patient.

5. Conclusion

Daily therapeutic purgation, diet restriction and Ayurvedic Medicine had shown improvement in all the Symptoms of Jalodara. In the present case abdominal distension, bipedal edema, anorexia, and all above Symptoms were significantly improved without any side effect. The patient was kept only on milk diet. No any complication ware noted during & after the treatment. Hence, it can be concluded that Ayurvedic Medicines with Nitya Virechana & restricted diet gives better result in Ascites.

Compliance with ethical standards

Acknowledgments

I express gratitude to the Department of Kayachikitsa and Hospital Authority for giving me this opportunity to study this particular research topic: A case study on understanding "Ayurvedic management of Jalodara with special reference to Ascites: A Case study." Special thanks to Secretary of Maharashtra Arogya Mandal’s Secretary, Hon’ble Mr. Anil Gujar, Hon’ble Principal Dr. Nilesh Phule and Faculty members Dr. Yogesh Kotangle, Dr. Vijayalaxmi Patil, Dr. Ritesh Damle, Dr. Kiran Ubhe for co-operating throughout the research study. Many thanks to my colleagues, as we got to learn many new things while reviewing the research articles and our knowledge regarding the subject has been increased.

Disclosure of conflict of interest

The authors declare that there was no conflict of interest regarding the publication of manuscript.

Statement of informed consent

Informed consent was obtained from all individual participants included in the study.
